

# FACT SHEET

## Overview

**Foundation: 1984**  
**Headquarters: Munich**  
**Number of employees: 258**  
**Turnover ConSol Group 2019/2020: EUR 28.9 million**

## Mission & Vision

For more than 30 years, ConSol Software GmbH has been successfully supporting customers from all industries with national and international IT projects. "Enterprising IT" is our credo, which we live every day.

**Agility distinguishes us:** From high-end IT consulting, software engineering, IT operations to DevOps - our specialists, implementers and innovation drivers develop tailor-made solutions and think both future-oriented and flexible. ConSol uses open source solutions and other technologies for this purpose. In addition, the company develops and distributes the ConSol CM software, a platform for digitizing business processes.

At ConSol, the focus is on people. In everything we do, the trust and success of our customers always comes first. Our employees bring their fascination for technological challenges to every customer project.

Michael Beutner  
 chief executive officer

Dr. Ulrich Schwanengel  
 founder and owner

Andrea Stellwag  
 chief financial officer

Bernd Wiserner  
 chief resources officer

## Competences & Services

### Software Engineering - for Your Digital Future

Whether modern software architecture, future-proof IT integration or a tailor-made CI/CD pipeline – we can help you master the challenges of digitisation.

### IT Consulting - your Partner at Eye Level

We bring a breath of fresh air into your processes & digital strategies. Agile, competent and with individually tailored consulting services, we support you e.g. in open source monitoring or cloud issues.

### IT operations - Made to Measure

Whether managed services, IT operations or support – at ConSol you choose exactly the services you need to keep your IT running efficiently. Individual SLAs provide calculation security – on-prem or in the cloud.

### IT Solutions - from Practice for Practice

We are a place where the spirit of research meets technological challenges. This promotes innovations that result in IT solutions with high user value. For example our software ConSol CM, our open source offer for test automation or Red Hat Solutions.

### Process Management Software ConSol CM

Whether individual or standardized: With ConSol CM you can easily record, control and quickly resolve inquiries from customers, employees and partners.
